## CELEBRATIONS

### Dr. Steven G. Lester Hosts Special Reception

Radiation Oncologist, **Steven G. Lester, M.D.**, hosted a reception at his home on Nov. 4 to honor a team of physicians and friends who have been caring for Central Florida breast cancer patients.

“For the past 11 years, a core group of physicians have worked with passion and diligence to care for women of Central

Florida who have been diagnosed with breast cancer,” Dr. Lester said. “Because the best treatments for breast cancer require a multidisciplinary team approach that crosses into numerous medical specialties, these dedicated physicians usually communicate with each other via phone and written consultation. So I decided to get everyone together to allow the team time to interact face-to-face and to celebrate the fact that we have successfully cared for thousands of breast cancer patients over the past 11 years.”

*Dr. Steven G. Lester meets with Dr. Shenin Sachedina and Dr. Julio Gundian; Dr. David Molthrop and Dr. John Looper celebrate 11 years of caring for patients with breast cancer.*
